CASE OPENING MEMORANDUM

Case: LP-2026-0088

Opened: 6 March 2026

Subject: Sam Parker, account 47, 980 Maple St, Omaha, NE 68101

Prepared by: Ada Okonjo, Loss Prevention Analyst

1. GROUND FOR OPENING

Case LP-2026-0088 investigates Sam Parker for suspected return abuse. The ground is the red flag at Section 6 of the Return Policy Manual 2025, Red Flags for Fraudulent Returns, item 2: "Pattern of returning high-value electronics".

Sam Parker has nineteen recorded purchases and eight returns, a return rate of 42.10%. The account carries a fraud risk score of 85 and its status is under review. Three suspicious-activity notes are on file.

2. PATTERN

Every one of the eight returns was an electronics item in opened condition. Seven of the eight were lodged on day 13 or day 14 of the 14-day opened window. The items were a Samsung 65" QLED TV on three separate occasions, an Apple iPhone 15 Pro twice, a Sony PlayStation 5, a MacBook Pro 14" and a set of Bose Headphones.

Stated reasons vary and do not corroborate one another: changed mind, not as described, defective, too expensive, found better price. The defective claim on the Sony PlayStation 5 was the only one to attract no restocking fee.

3. PAYMENTS

A chargeback was raised against order ORD-2024-00008 after the refund had already been issued. Loss Prevention treats a chargeback on a refunded order as an indicator, not a finding.

4. WHAT THIS MEMORANDUM DOES NOT SAY

No conclusion is drawn. Sam Parker has not been notified and no privilege is suspended. Case LP-2026-0088 remains open pending review of the resale enquiry running separately.
