

FENWICK VALE GENERAL HOSPITAL

Department of Internal Medicine

DISCHARGE SUMMARY

Encounter: ENC-2026-0512

Patient: Ms Odalys Ferreira, hospital number 52-90144

Discharged: 18 April 2026

Clinician: Dr Marcus Villanueva, Consultant Physician

1. ADMISSION DIAGNOSIS

Hypertensive crisis, resolved with intravenous labetalol followed by oral therapy. Blood pressure on discharge was 138/84.

2. DRUG ALLERGIES

A drug allergy is recorded on the admission note for this encounter. Prescribers reviewing this patient should refer to the admission note rather than relying on this summary alone, as the allergy is not restated here in full.

Encounter ENC-2026-0512 · continued

3. DISCHARGE MEDICATION

Amlodipine 10mg once daily, continued. Doxazosin 4mg once daily, newly started.

4. FOLLOW-UP

Referred to the cardiology outpatient clinic under Dr Priyasha Kohli for ongoing blood pressure management and review of long-term therapy, given the limited options following the 2015 withdrawal of calcium channel blocker therapy.

Dr Marcus Villanueva, Consultant Physician
