

ST OSWALD'S TEACHING HOSPITAL

Department of Acute Medicine

ADMISSION NOTE

Encounter: ENC-2026-0451

Patient: Mr Tobias Renner, DOB 14 May 1961, hospital number 88-40217

Admitted: 3 February 2026, 21:40

Clinician: Dr Aoife Brennan, Consultant Physician

1. PRESENTING COMPLAINT

Mr Tobias Renner presented with a productive cough, fever of 38.9C and right basal crackles. Chest radiography shows consolidation of the right lower lobe. Mr Tobias Renner has a diagnosis of community acquired pneumonia.

2. ALLERGY HISTORY

Mr Tobias Renner is allergic to Amoxil. The reaction recorded in 2019 was urticaria with facial swelling, which the patient describes as requiring emergency treatment. This allergy is to be treated as absolute.

No other drug allergy is reported. The patient is unable to name the drug class and recalls only the brand on the packet.

3. RELEVANT HISTORY

Type 2 diabetes, diagnosed 2011. Hypertension. No known renal impairment, with an eGFR of 74 on admission bloods.

Dr Aoife Brennan, Consultant Physician
