

FENWICK VALE GENERAL HOSPITAL

Cardiology Outpatient Clinic · Prescription Chart

Encounter: ENC-2026-0567

Patient: Ms Odalys Ferreira, hospital number 52-90144

Date: 3 June 2026

Clinician: Dr Priyasha Kohli, Consultant Cardiologist

1. REGULAR MEDICATION

Dr Priyasha Kohli prescribed Cardaze 5mg once daily, in place of amlodipine and doxazosin, to simplify the patient's antihypertensive regimen following review.

Dr Priyasha Kohli also prescribed Utrenix 200mg twice daily and Fenlorapine 50mg once daily for newly diagnosed paroxysmal atrial fibrillation identified on ambulatory monitoring.

Encounter ENC-2026-0567 · continued

2. AS REQUIRED

Paracetamol 1g up to four times daily for joint pain, continued from the patient's own supply.

3. NOTE

This clinic does not have automatic access to inpatient allergy records from other departments. Prescribers are asked to confirm allergy status directly with the patient at each visit. Ms Odalys Ferreira did not raise a drug allergy at this visit.
